Profile

Diligent software engineer with 5+ years experience in software development.I am an avid lover of Clean Code and Architecture and often use them in projects I work on to manage and reduce system complexity. My skills as a Software Developer are not tied to frameworks or libraries but rather I see them as necessary tools to get the job done hence I am a ridiculously fast learner when I have to use tools I am not familiar with.

Experience

Vetcity INC.   2021-2022

I wrote and designed code that met the requirements of the application and the user stories, both in the development of the organization's website and in the user management system. Using technologies like React, TailwindCSS, JavaScript, Node, Express. This was a remote job.

Education

University of Ghana, Legon   Since 2021

Bachelor of Computer Science

Opoku Ware Senior High School   2016-2019

General Science

Skills

01 Full Stack Web Development
